### **DETAILED ACTION**

1. Receipt is acknowledged of the amendment filed on February 23, 2007, which has been fully considered in this action.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4, 22 and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1, 22 and 23 contain the newly added limitation "a cross-sectional area smaller than the fuel flow section" and specification is silent to such a recitation and is considered new matter.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3752

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 24 is rejected under 35 U.S.C. 102(b) as being anticipated by Merminod et al (WO 99157465).

Regarding claim 1,10, and 18 Merminod et al discloses a gaseous fuel injector comprising:

-a body (10);-a chamber of the body in which there is mounted a valve member (17) and an actuator means (13) for actuating the valve member between a closed position and an open position in which the valve member defines a fuel flow section, See Figure 1; -a fuel feed duct (26); -a fuel delivery duct (36); -wherein the fuel feed duct and the fuel delivery duct open out into a chamber of the body, See Figure 1; -wherein the fuel delivery duct comprises a calibrate segment (23) of a section smaller than the fuel flow section defined by the valve member when the valve member is in an open position, See Figure 1 and the fuel delivery duct is arranged to obtain a flow speed of fuel in the calibrated segment that is substantially sonic. See page 8 lines 2 to 6 of the specification.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3752

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
